Patman Offers Plan to Pay Off 300 Billion Debt

WASHINGTON — (U.P.) — Rep. Wright Patman (D-Tex.), told the house ways and means committee Saturday that the government could pay off a national debt of $300,000,000,000 in 40 years if it adopts a plan for eliminating interest payments on a large part of the credit used for financing the war.

He proposed that the treasury department deliver non-interest bearing, non-negotiable government securities to the 12 Federal Reserve banks in return for credit in the amount of the certificates.

"In this way," he added, "the government can pay each year 2½ per cent to the Federal Reserve banks on these bonds or certificates and in 40 years the entire debt will be liquidated. Under the present plan our government can pay 2½ per cent each for 40 years as interest and none of the principal of the debt will be paid and all of it will be still owing at the end of 40 years.' Sugar Beet Producers Get Increase

WASHINGTON — Sugar beet growers of Wisconsin are guaranteed an increase of $1.50 per ton over the 1942 crop, making the total average about $9.25 to $9.50 per ton for ordinary quality beets, and on this basis returns for the 1943 crop should average around $11 per ton.

Under the department of agriculture program, the Commodity Credit corporation will offer through sugar processors to purchase sugar beets from farmers at about $1.50 per ton above the estimated levels applicable to the 1942 crop for beets of average quality and in turn, sell such beets to processors on the basis of sugar prices prevailing during the last half of 1942.

The program would provide that processors pay to the CCC all market returns from the sale of sugar above the level used in computing the resale value of sugar beets to the processors. If the increase of such returns plus the amount at which the CCC sells the beets back to the processors exceeds the amount at which beets are purchased from farmers, the CCC will use such excess to make supplemental payments to processors. These supplemental payments would be based on the processor's proportionate share of all beet sugar produced from the 1943 crop, and would be divided equitably with beet growers.

Processors will be expected to maintain the usual arrangements with growers regarding financing seed, deliveries, labor procurements, field advice and other services.
