ROAD HEAD RAPS STATE STEEL CUTS

HARTFORD, Aug 23 — (AP) Connecticut's allotment of steel for essential highway and bridge projects is much smaller than it should be, State Highway Commissioner Albert Hill asserted today.

To meet its 1951 requirement he said Connecticut needs 13 702 tons but thus far it has received only one-fifth of that amount

In a letter to Acting Governor Edward N Allen Hill said

"I believe such curtailment in Connecticut's highway steel needs is asking us to do more than our share of sacrifice and cooperative effort"

On the basis of national defense needs Hill contended Connecticut's steel allocations should be "cut by 30 per cent, but no more"

Hill said the 'situation is indeed critical "because many of the proposed Connecticut projects are designed to serve vital defense production areas

Word from the governor's office was that it would back Hill in efforts to get a bigger steel allotment for his department
