PRODUCTION STARTED AT OIL WELL IN ISRAEL

HELETZ OILFIELD, Israel, Nov. 24—(AP) Israel's first oil well started production today at the touch of a lever by Development Minister Mordechai Bentov.

The movement sent crude oil from 5,000-feet down gushing into storage tanks. After three or four days of tests, it will be taken to the oil refineries at Haifa.

The oil was discovered about two months ago. Bentov said he hoped this and subsequent fields will become the foundation of Israel's economy and open the door to large scale immigration.

The name "panther" is often used both for the leopard and for the puma.
