

The Idea Hunter

WITH ED BISHOP

An innovation in bandage makes its bow. This new type of bandage is applied without the necessity of being tied, as it is self-adhering. It allows free circulation of air and will not stick to skin or hair nor leave any marks. In addition to its medical uses, this bandage can be used as ankle braces for golfers, tennis players, etc. It can also be utilized in taping tennis rackets, golf clubs, mechanics' tools and other articles to provide a firm grip. It also has potential value as a beauty aid in the form of a chin strap.

If you know of some novel idea, actually being worked, help spread the news by sending full details to Ed Bishop, care of this newspaper. Further information on any idea published here will be given to anyone inclosing a self-addressed stamped envelope.
