[meg. is for megacycle; m. for meters.]

Atmospheric conditions permitting it is simple on modern receivers to pick up war news direct from European capitals. Short wave broadcasting is confined mainly to narrow bands located approximately at 16, 19, 23.31, and 49 meters. At this season of the year listeners usually find the 16 meter band best for European transmission in the morning hours; the 19 meter from noon to early evening; and the 25, 31, and 49 later. This may vary somewhat in various sections of the country.
