## Make Yourself a Job WITH ED BISHOP The Idea Hunter

A new contrivance that has been pronounced thoroughly serviceable is a sugar container of the pour-type, common in restaurants, invented by a Filipino youth in Los Angeles. The novelty lies in the top to the container which discharges exactly one teaspoonful of sugar at a time in a fool-proof manner. The user merely upturns the container and works a small plunger with the forefinger, each operation of the plunger discharging a spoonful of sugar. The restaurant owner prevents waste and the patron gets the desired amount.

If you know of some novel ideas actually being worked, help spread the news by sending full details to Ed Bishop, care of this newspaper. Further information on any idea published here will be given to anyone including a self-addressed stamped envelope.
