

The Idea Hunter

WITH ED BISHOP

Here is a well-developed idea of special interest to both owners and occupants of apartment-houses with wall beds. Such beds are lowered at least once a day and usually dropped on the carpet in the same place, eventually causing worn spots and necessitating carpet replacements. This article is a set of trends for the bed legs, specially made for resiliency as well as strength, preventing carpet wear and minimizing annoyance to tenants below. It is also designed to absorb vibrations caused by passing street cars, trucks and elevators in the building, and improve the comfort of the bed.

If you know of some novel idea, actually being worked, help spread the news by sending full details to Ed Bishop, care of this newspaper. Further information on any idea published here will be given to anyone inclosing a self-addressed stamped envelope.
