Get new glasses now for holiday occasions — but wait until next year to start budget payments
Thousands now wear Blended Lenses Instead of Bifocals.

HOW TO SEE BETTER WITHOUT BIFOCALS

1. We offer a simple test to show you the difference between Blended Lenses and Bifocals.
2. With bifocals, see paper on floor jump when moving head up and down. Note how you see double when looking through part of reading and part of distance lens at once.
3. With Blended Lenses, paper will not jump, and you don't see double, no matter what place on lens you look through.

NO DIVIDING LINE to confuse you
Blended Lenses do more than bifocals (near, far, and intermediate sight) without the handicaps of bifocals.
Come in or write for free booklet, "The Story of Blended Lenses."

Dr. Pridham Davis, Opt. D.
Personalized styling on all types of glasses
