World to Hear Hull's Foreign Trade Week Message on May 27

Radio's most perfect "fatherly voice" belongs to Bill Adams, above. He has played both George Washington, father of his country, and Franklin D. Roosevelt on the air. Now he's heard as the father in "Your Family and Mine," heard Mondays through Fridays over the NBC-Red network.

1937 Relief Costs Drop, Survey Shows By Harlan Miller

Costs of relief declined approxmately \$24,000,000 Wisconsin in 1937 compared to 1936, the first ed by the tots of many official drop in such expenditures since 1932, the Wisconsin Taxpayers Alliance reported today.

General relief costs in 1937 were substantially the same as in 1936, the Alliance stated, with a 30 per cent reduction in expenditures of the works progress administration being the major cause of the reduction in Wisconsin relief costs. A rough estimate by the Al-

liance based upon the average case load in Wisconsin from 1933 to 1937 (figuring four persons to the case) indicated that 535,000, or one-sixth of the state's population, received relief during each of those

"Approximately two-thirds of relief money spent in Wisconsin in 1937 was supplied by the federal government," the Alliance stated, adding that it was a smaller share of total relief expenditures than in any other year since the federal government began furnishing cash relief to states in 1932.

AFL Notes 11,231,700 at Work

WASHINGTON - (U.P.) - The American Federation of Labor today estimated unemployment in March at 11,231,700 persons, the highest since March, 1935, but added that trade union figures show a slight upturn in employment during April.

Production to Blame "These figures show that dras-tic cuts in production are responsible for our present unemployment," the federation said. "Distribution is still at relatively high levels and workers' buying power still presents the chief bright spot in this gloomy picture.

"Although industrial production in March was 33 per cent below last year, workers' buying power was only 15 per cent lower. The decline in workers' income was due chiefly to unemployment, since weekly wages, even with the shorter schedules now being worked, were only five per cent below last year. Wage Levels Help

established last year are helping to maintain business. When the late Easter season this year is accounted for, retail sales in March were only 7.5 per cent below last year. The fact that retail sales are within 7.5 per cent of last year, although production is down 33 per cent, shows a stronger foundation of consumer buying than has been realized. "Unless this buying power is

cut away by further unemployment or wage reductions it is bound in the end to restore productivity."

and enunciated a ing to disastrous levels. Officials close to the situation told the United Press that chances might as well are 100 to 1 that the government will make loans to the farmers on the wheat crop in order to guarantee them a fair price and prevent the market from becoming glutted. Loans Mandatory

Only a major crop disaster—a severe drought of nationwide proportion-can obviate loans, an official said. Under the new crop control act, loans are mandatory If the 1938 yield exceeds domestic needs and estimated exports demands-about 740.000,000 bushels. Government estimates now place

the crop at between 925,000,000 capital capers: Trembling and 950,000,000. A winter wheat estimate of between 740,000,000 and 750,000,000 bushels is expected Tuesday, while the spring wheat crop is expected to reach 200,000,-000 bushels.

Added to this will be a carryover of 150,000,000 bushels or more from last year's bumper crop of 874,000,000 bushels. The total supply is expected to reach an alltime record high of approximately 1,100,000,000 bushels. Insurance Too

In addition to the loan program, Secretary of Agriculture Henry A, Wallace will move to bolster the market through the new government crop insurance program. Already an intensive campign is under way to "sign up" for wheat insurance. The insurance program is expected to remove about 50,000,000

bushels of wheat from the market through farmer payments of premiums on 1939 wheat insurance. The government will store this wheat in elevators for future indemnity payments to insured farm-In connection with the program
