NEW YORK, May 13—(AP)—Recovery signs appeared in today's brief stock market proceedings but, in most cases they were faint as to be barely discernible.

It was a crawling session throughout with transfers of approximately 175,000 shares among the smallest in nearly a year.

Sentiment seemed to be slightly improved as recently waning hopes for tax revision in congress revived a trifle.

No great stimulation was derived from business news and the European picture, at least for the moment, was viewed as a neutral market influence.

Prospects that soft coal would start moving Monday, were moderately encouraging.

Small advances at one time or another were posted for U. S. Steel, Bethlehem, Chrysler, General Motors, Montgomery Ward, Standard Oil of N. J., Consolidated Edison, Southern Railway, Westinghouse, Union Carbide, International Harvester, Deere, Allied Chemical, Eastman Kodak and Glenn Martin.

Some of these eventually slipped.

Bonds were selectively in demand. With the exception of cotton futures, which were given an upward push on reports Spain might arrange huge purchases of this staple in the United States, commodities lacked rising vitality.

Considered by analysts were the federal reserve board figures disclosing department store sales for the country as a whole, in the week ended May 6, dropped 3 per cent below the comparable period a year ago when trade was far from satisfactory.

Not so pleasing also was the National Machine Tool Builders' association summary for April showing both foreign and domestic orders in this month fell 16 per cent from the March aggregate.
