NEW YORK, Nov. 18-(AP)-Slight price changes either way ruled in today's early stock market proceedings.

Market analysts studied federal reserve figures disclosing the country's department store sales for the week ended Nov. 11, registered an increase of 7 per cent over the like 1938 week compared with a gain in the preceding week of 13 per cent.

The reserve beard, in a survey of economic conditions, indicated national industrial production during the first half of November approached and possibly exceeded its previous record.

Notice was taken of predictions made at a conference of the United States Chamber of Commerce that a substantial jump in building construction was likely in 1940, with costs remaining relatively stable in spite of any possible effects of the European conflict.

Pep Meeting Scheduled At South Nov. 22

A snake dance and pep meeting will be held in South's athletic field on the eve of the South-Central game, Nov. 22, and will be followed by a dance in the girls
