New Strength for the Staff of Life!

THAT'S WHAT New MILLING AND BAKING PROCESSES GIVE YOU

The APRIL Readers Digest says

"The speck (sheep heart or embryo) is the richest known source of Thiamin or Vitamin B without which we would stop growing, lose weight, muscle control, appetite, mental efficiency and hearing."

Yes, there's more than super-delicious flavor in this new white bread that contains the wheat heart (embryo) . . . yet flavor is what gives this new white bread a prominent place on the dining table three times a day . . . and between meals.

This new white bread — that reminds you of the old-fashioned, home-baked bread of grandmother's time — is the result of months of baking experiment to combine the finest, purest and most nutritional of ingredients in a superb loaf of white bread.

This new bread stays fresh for days. It toasts beautifully. Buy it! Try it! Eat it for ten days and be convinced that it tastes better, toasts better and is better for you.
