Two Junior Livestock Shows Planned for Stock Pavilion in Fall

Plans for two junior livestock shows to be held at the University of Wisconsin stock pavilion this fall were announced today by the Wisconsin Live Stock Breeders' assn.

Lambs and pigs will be exhibited Sept. 22-24, and the beef cattle exposition is scheduled Oct. 20-22.

Both shows are open to any Wisconsin boy or girl between 10 and 21 years of age.

Members of 4-H clubs will compete in a meat identification and judging contest Oct. 20 in connection with the beef show.

More than 40 prizes donated by business houses and stock organizations are to be offered in the two shows.

Lambs will be exhibited in seven classifications, and a grand champion chosen. Divisions are: Shropshire, Hampshire, Oxford, Southdown, Cotswold, Cheviot, Corriedale, Dorset, Leicester, Lincoln, or Rambouillet; grade or crossbred lambs, and pen of lambs.

Classes for pigs are Poland China, Chester White, Duroc Jersey, Hampshire, Berkshire, Yorkshire, and Tamworth, and pen of barrows.

Contestants in the baby beef show will exhibit in 25 classes. Shorthorn, Hereford, Aberdeen-Angus, and Red Poll cattle will be shown, and prizes are to be given for the best herd of three calves of the same breed shown by one exhibitor.

The 1940 show attracted 381 southern Wisconsin exhibitors last year. A Northwest Wisconsin show is to be held at Menomonie Sept. 15-17 this year, and exhibitors will be picked to show their animals in the Madison exhibitions.

County agricultural agents and the university college of agriculture are cooperating in the show plans.

Boom Production, Townsend Asks Nation's Farmers URBANA, Ill. (U.P.)—A government spokesman called upon mid-west farmers Monday to boom production for defense with the assurance that the department of agriculture will guarantee average prices for dairy products, hogs, chickens, and eggs.

M. Clifford Townsend, former governor of Indiana and now director of agricultural defense relations for the department of agriculture, spoke on the nationwide "food for defense program" before the farm bureau federation training school here.

"Without food, Britain and the other nations resisting aggression cannot continue to stand behind the United States and the Hitler menace," he said.

Townsend termed the prices at which the government is pledged to support vital food products as "guaranteed minimum prices."

In addition to dairy products, hogs, chickens, and eggs, Townsend said the government wants to stimulate production of tomatoes, dried beans, and soybeans.

Gehrmann had the letter inserted in the Congressional Record for Jan. 13. He called it to the attention of the defense commission on Jan. 16. A few weeks later the ground-work for the "aluminum for defense" program was laid.

"My idea is as follows: 'In nearly every home in the United States there are one, two, or perhaps three old aluminum cups or kettles or something along that line lying around.'

"I believe that the American Legion could get the people sufficiently interested that

State Cattle Exports Pass 1940 Level

Exports of hogs for the period totaled 9,844 this year and 11,735 a year ago. The number of hogs imported up to July 1, 1941, was 1,571 compared with 1,763 for the first six months of the preceding year.

The state imported 18,839 sheep compared with 18,647 for the same period last year and exported 45 sheep compared with 36.

The number of horses shipped into the state for farm use was 4,969 as against 5,922 for the first six months of 1940. Eighty-eight horses were exported compared with 162 during the same months last year.

The men and women who keep bees and aren't afraid of their stings were to open their annual convention today with a meeting at Mt. Horeb this morning and at Blue Mounds this afternoon.

H. J. Rahmlow, secretary of the Wisconsin Beekeepers' assn., and James Gwin, head of the bees and honey section of the state department of agriculture, were to take part in the program.

Meetings are scheduled at Appleton Wednesday and at Menomonie Thursday.

lotment may market excess wheat from this year's crop without penalty.

The provision will enable the growers who exceeded their acreage this year to escape the 49 cents a bushel penalty on wheat grown in excess of their Agricultural Adjustment Administration allotment.

Any farmer who over-planted his 1941 allotment by 10 acres, for example, could market all his wheat free of a penalty if he under-planted next year's crop by the same number of acres, officials explained.

Exceptionally large stocks of corn, oats, and wheat are being held by Wisconsin farmers this year, according to estimates of the crop reporting service of the Wisconsin and United States departments of agriculture. Farm stocks of these grains for the United States are much above the average for the period 1930-1939 and, with the exception of corn, are larger than a year ago.

July estimates indicate that Wisconsin farmers had 10,759,000 bushels of corn on hand compared with 7,610,000 bushels a year ago. Compared with the 4,216,000 bushels for the 1930-39 average, the present stocks are nearly two and one-half times larger.

Oat stocks are estimated at 20,327,000 bushels compared with 9,942,000 bushels a year ago and 10,335,000 bushels shown for the 10-year average.

Holdings of wheat on Wisconsin farms are estimated at 488,000 bushels. Only 284,000 bushels of wheat were on farms in the state a year ago and the average holdings for 1930-39 were 317,000 bushels.

Stocks of old corn on farms throughout the United States on July 1 were estimated at 741,734,000 bushels compared with 853,000 bushels a year ago and 457,831,000 bushels shown for the 10-year average. Fully 218,817,000 bushels of oats and 89,997,000 bushels of wheat are on farms. A year ago estimates indicate 143,488,000 bushels of oats and 82,146,000 bushels of wheat. Stocks of oats during the 10 years, 1930-39, averaged 155,661,000 bushels and wheat holdings for July 1 averaged 59,691,000 bushels.
