Rubber Bounces, But Why

AKRON, Oblo-(U.P)-Scientists at this rubber industry center had not rebounded as yet today from a particularly elastic question bounced at them. A man telephoned the public

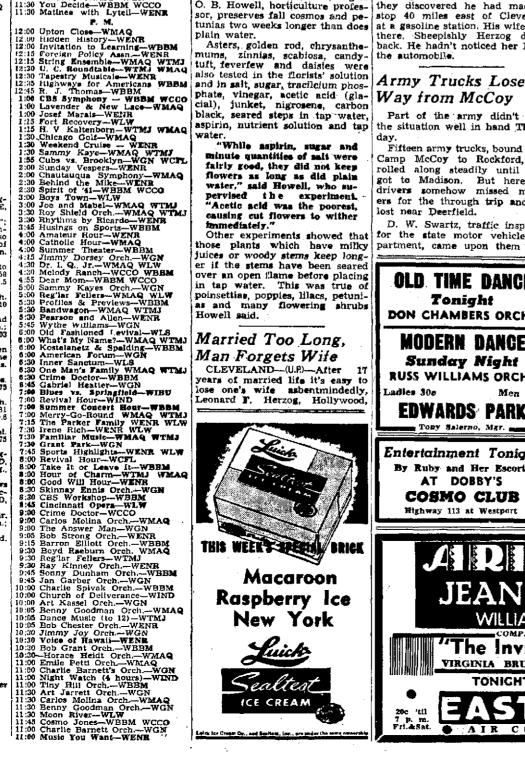

relations department of the B. F. Goodrich co. an dsaid: "I want to know just what makes rubber bounce. I just made a het." "Call back in half an hour," the public relations man answered.
"We will tell you all about it

then.' The chemical heads of the industry, men who studied the physics of rubber, were consulted.

The inquirer received this anwer;
"We're sorry, but just exactly why rubber bounces isn't known and we can't give you a definite

TWICE AS PROMISING PLAYERS WHO have not ex-mined the two combinations comparatively are paone to con-alder an A-Q as the ideal kind of tenace for purposes of try-ing to win a finesse. They look upon the A-J-10 as a sort of sec-ondary proposition. Actually, if you are in a position to make two leads toward it. the A-J-10 is three times as likely to produce a finessing trick. To win with the first combination, you must find the K right where you want it. To win with the second, you can find either the K of O or with the either the K of Q, or both, in the hand which plays first to your lead, and you fail to win an extra trick with it only when the fourth alternative prevails, with both of those cards in the hand which
