# WERE PULLED OUT OF THE AIR

This is a story of headlines.

The first headline reads, "Navy Announces Two Tankers Sunk in Atlantic"

The second headline says much the same—"Tankers Torpedoed—Fuel Runs Low in Massachusetts"

Hot water becomes a luxury in New York. Homes can't be kept quite warm enough. Cars without gasoline stand idle in Pennsylvania, Connecticut, Virginia. and Maine.

What to do?

America turns to her railroads. Can they carry a greater share of the load? They can and they do

Starting with normal shipments of 12,000 bbls. of oil a day, the Eric together with other railroads double this figure. Then we double it again and again and again until we are carrying

850,000 bbls. a day. Seventy times as much today as in 1941!

Phenomenal? Yes, but no trick of magic. It takes years of "know-how", the pooling of facilities, and the interchange of new operating ideas to make one train do the work of many-to pull 10,000 tank cars out of the air. The wholehearted support of govern-

ment agencies helped. So did the coop-

cration of civilian shippers and car

owners. But the most important factor

was an intangible-a will to serve the

American people that is present all the time, in peace as well as in war. In spite of every submarine in the Nazi navy, fuel oil and gasoline are

going through. And the last headline reads, "Threat

to Comfort and Health of America's Homes Banished".
