'RICK' TALKS TO WAR WORKERS

Capt. Notice the intent expressions on the faces of the war workers gathered on and around a fuselage jig.

METHOD FOUND TO EASE PAINS OF CHILDBIRTH

CHICAGO, Jan. 23 (INS) A new method for comfortable and painless childbirth that is safe for mother and child was announced today in the Journal of the American Medical Assn.

The new method, reported by Dr. Robert A. Hingson and Dr. Waldo B. Edwards, both of Staten Island, N. Y., who devised the apparatus for administration, consists of continuous injections of a solution of metycaine, a cocaine substitute, into the lower tip of the spine where the nerves which transmit pain impulses are located.

Administration is started when the patient is in labor, the Journal said, and additional injections are made every 30 to 40 minutes, according to individual requirements, during the entire course of labor.

Dr. Hingson and Dr. Edwards, who call the new method "continuous caudal analgesia," warned that the treatment should be given only in hospitals and that there are certain types of cases in which its use is contraindicated.

The physicians have used the new technic in 589 cases in which "there were 586 live births with no maternal complications or deaths." The average length of treatment was six and one-half hours, the shortest 35 minutes and the longest 33 hours.
