rocks, they go there to make their

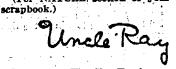

nests. In the daytime they go out Several families of these small

get out of the way of enemies. Some hunters have reported finding a colony guarded by a sentinel. The sentinel, they declare, gives a shrill cry to warn the others of danger.

The flesh is eaten by people, being especially prized in southern Africa. In that area the Boers call the hyrax a "klip-das", meaning "rock rabbit." There are pads on the feet, and the pads stick so well that the animal can cling to a rock wall which is straight up and down.

Hyraxes have tails which are so short as to be hard to see. Their

thick for is gray or brown. Besides the rock-dwelling hydraxes, there are some which live in trees. They climb the trunks very well, and find hollow places in which to nest. (For NATURE section of your
