Uncle Ray's Corner

Comet's Head Contains Gas and which stretch out millions of miles. Nucleus of Solid Lumps

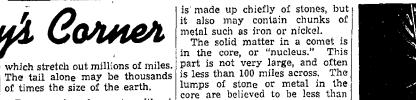

than that of the earth!

OF ALL known heavenly of times the size of the earth. Photographs of comets without 50 feet thick on the average, and

bodies, comets have the any tails have been made through many of them may be smaller than least weight, or "mass," com- telescopes. Later a certain compared with their size. If threre et has been photographed again, were 2,000,000 comets, and we and a small tail has appeared. Still later, as the comet moved

of gas which makes up the rest of put all of them together, the closer to the sun, the tail has the comet's head. The entire head may be 3,000 or 4,000 miles across, combined weight would be less grown to enormous size. or it may have a width of more A comet without a tail is a than 1,000,000 miles.

That is the more surprising mass of gas with a small amount When a comet gets closer to the "push" some of the gas out of the when we think of the vast size of solid matter. There is reason sun, its tail grows. This is due to comet, and make it stream far be-

Around the core is a great deal 11-16

> Dingram of a comet rounding Great Comet of 1843. the sun. Note that the tail always turns away from the sun.

The tail points away from the sun. This is made very clear when a comet goes around the sun at a close range.

13 M

by King Pe

One comet got to a point only 80,000 miles from the sun. That is a short space compared with most of the distances between objects in the sky.

The gas in a comet's tail is thinner than the air around the earth. Yet it makes a beautiful sight in the case of a large comet like Halley's or Donati's or the
