Uncle Ray's Corner A LITTLE SATURDAY TALK: THE MOON AND THE TIDES

Twenty-five questions appear in a letter from Mr. Albert Wol-pert, who says, "I think you are the one who can answer them. If I had the space, I would like to answer all of the many hundreds of questions which come to me. As it is, I try to take up those which have interest for readers in

"How many new moons are there in a year of 365 days?" he Some years have 13 "new

moons" but others have only 12. Last year, for example, there were 13 new moons, with two of them coming in the month of July, The present year, on the other hand, will have only an even dozen new moons. There will be one

moon for this month of February is due on the 23rd. If the first new moon in any year comes carly in January, that year will have 13 new moons. Two other questions are "What makes the tides?" and "How many

new moon each month. The new

tides do we have in 24 hours?" The earth's tides are caused by the moon and sun. The moon has about twice as much to do with them as the sun.

It is "gravity pull" which makes
