Uncle Ray's Corner

Gigantic Instrument of Violin Shape Was Played in London

other stringed instruments. only a very short distance.

The shape and size of the sound When a cello is played, the low-| It stood 10 feet high, and the box have a great deal to do with er end is placed on the floor. The player could not reach the finger-the music. In a general way, we same is true of the "double bass," board may say that the larger the box, which is even larger than a stand—

The octobass was played in the deeper the tones.

WE 9 00

PHAULING

JOE'S MOVING

the violoncello and the double any limit exists to the size of the That instrument made powerful bass.

A standard cello is 48 and a half hard to play. The sound box picks up sound inches long, from the head to the waves from the strings, and makes base of the body, or sound box, on record was the "octobass" them louder. If it were not for the Like the violin it has four strings, which was made close to a century box, the sounds could be heard for but they produce much deeper ago. This was in the shape of a and stronger tones,

sounding box which a stringed in-strument can have. It seems there strument can have. It seems there Yesterday we had a few words about sound boxes on violins and is pronounced "CHEL-o."

In everyday speech a violon-strument can have. It seems there is no limit except that one might be made so big it would be too

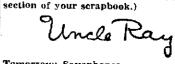

BUT MUM PREVENTS RISK OF UNDERARM

ODOR TO COME!

The octobass was played in London in 1851, Standing beside

A violin can produce pleasing music, but there are deep tones music, but there are deep tones a food deal larger than a standard J. B. Vuillaume worked the bow which it cannot give. That is why larger members of the violin family have been built—the viola,
