## Grandma Switches Millions of Mothers To Her Mutton Suet Idea For Chest Colds

Newer Relief For Children's Colds' Coughs, Bronchial Irritation and Chest Muscle Tightness Being Had Everywhere.

Pioneer grandma liked to "rub" her children's colds with a "rub" containing mutton suet. Such a rub was her "old reliable" for relieving chest muscle tightness, soothing bronchial irritation, loosening phlegm, checking coughing, easing sting of chapped lips and nostrils. Today science has modernized this principle with Penetro, the salve with a base containing this same old-fashioned mutton suet, plus 5 active ingredients—so now Grandma's old idea is switching millions to this newer relief.

Your children will like Penetro the first time they feel it spread smoothly on chest, throat, back—its mutton suet base melts instantly, vanishing quickly. It gets to work 8 ways at once to make your youngsters more comfortable—(1) Penetro relieves cold's pain as it

mutton suet helps carry medication to nerve ends in the skin. (2) Relieves muscular tightness and congestion through counter-irritation (increased blood flow). (3) Loosens chest muscles, clearing through pleasant inhalation of instantly released vapors.

Your child will feel relief so quickly—as painful misery eases, as coughing is lessened, phlegm loosened, chest rawness soothed. Natural mutton suet comfortably and give nature a chance to restore vitality to his little body. That's why so many mothers are thanking Grandma for her idea—are praising science for perfecting it.

Penetro is available in drug stores, where to buy Penetro. Relieve your chest cold miseries as millions are doing today—get your jar of white, Penetro relieves cold's pain as it

PASSENGERS ENJOYED LITTLE SERVICE ON EARLY SLEEPING CARS

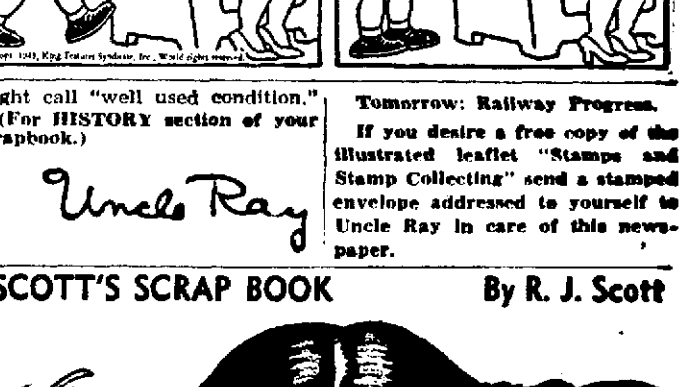

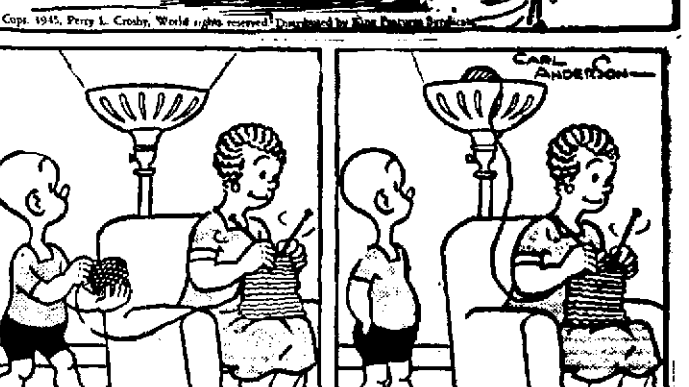

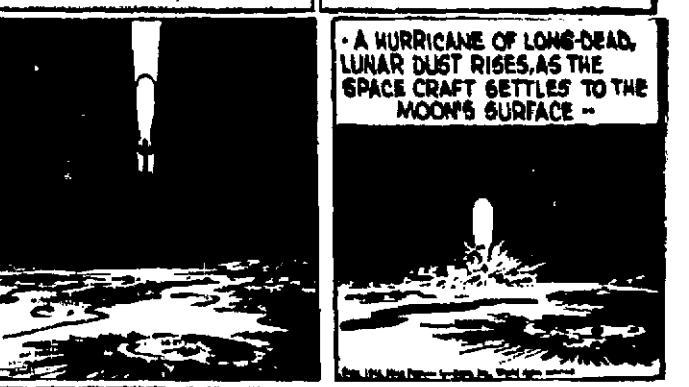

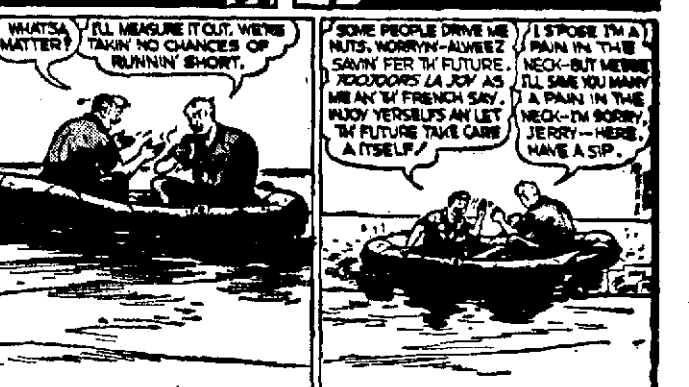

In the year 1858 a rather odd cartoon appeared in "Harper's Weekly," a magazine printed in New York. The cartoon had the title of "General View of a Night Car on the Central."

The "general view" which the artist showed was made up chiefly of the legs of men who were riding on a train at night. The legs were resting chiefly on the backs of the seats ahead of the passengers.

That was an amusing picture, and it had some truth in it. The seats in many railway cars of that time were closer together than those of the present. There was a great problem to find what to do with your legs when you wanted to sleep, especially when there were two passengers for each double seat. Even today there is much the same trouble when a person rides at night on day coaches of an older type. We do not, however, have the custom of draping our legs on the back of the seat ahead.

Sleeping cars were far from being common in 1858, but they did come in. Twenty-two years before, a company in Pennsylvania had started a sleeping car service. This was the Cumberland Valley railroad, and people who traveled from Harrisburg to another Pennsylvania town, Chambersburg, could sleep while they moved.

Perhaps I should say that such persons could sleep if they were able to do so while the car bumped
