Stimson Denies Plan to Reduce Army

WASHINGTON- (U.P) -Secretary of War Stimson said Wednesday that a statement that from 200,000 to 250,000 U. S. soldiers would be discharged monthly after the war in Europe ended was "both unauthorized and without foundation."

The statement was made by Brig. Gen. Frank T. Hines, vet-

portment intends to marshal against the Japanese "every soldier and every item of equipment that can be used effectively to speed our final victors." to speed our final victory."

Sides, Fins and Barbels

Deep sea fish are lighted in many ways. Some have rows of lights along each side, and others have only a few lighted spots. Still others have designs made up of so many tiny lights that it is hard to count them. A single fish may have from 800 to 1,500 of them!

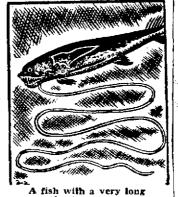

selves down there. One of the any paper.

up! Yet they would all be gone before long if that were the only way they could get food.

Another important source of food comes from animals which die in the upper levels, and then sink to the bottom. Certain plants, but not all kinds, sink to the floor of them!

a small scale, may remind a person of a locomotive headlight. Some fish of the deep sea have fins, tails and barbels which are lighted up. One strange fish, taken from deep water off Ireland's southeastern coast, was only sev-en inches long, but it had a lighted barbel more than two feet in

length! Fish are not the only kind of lighted animals in the deep sea. There also are lighted worms, sea squirts and squids. One kind of squid, found far below the surface, has hundreds of lights in neat rows on its body and tentacles. Since there is no green plant

glowing barbel.

"Lantern fish" are the best known of those which have lights. They usually are only about four inches long, but they are brightly lighted for their size. They have become well known because of their habit of rising toward the surface at night.

but not all kinds, sink to the floor of the sea after life passes from them. Thus they add to the food darkness of the ocean between the ocean between the surface at night.

but not all kinds, sink to the floor of the sea after life passes from them. Thus they add to the food darkness of the ocean between them. Thus they add to the food darkness of the ocean between them. Thus they add to the food darkness of the ocean between them. Thus they add to the food darkness of the ocean between them. Thus they add to the food darkness of the ocean.
