Babson Says 'Crabbing' Has No Place in U. S.; It Paces Whole World

By ROGER W. BABSON
(Special To The Lima News)
BABSON PARK, Mass., May 11—Compared with any other land on earth, we, the people of North America, now are sitting on top of the world.

Relative to any former period, we today have the greatest opportunity, both as to current conditions and future prospects. When you tune out the radio croaking long enough to attend to solid facts and figures, you sense the speed of recent reconstruction. The outlook is much brighter than some of the out-lookers.

During the recent big strikes there was an interval when a little grouching was, perhaps, excusable. It was a kind of low Monday Morning, a natural let-down after the victories of 1945. That period of indulgence, however, has gone; and I recommend that the time has come for all of us to cut out the crabbing and resume business.

Despite the actions of labor leaders here at home and of Russian leaders abroad, the situation, fundamentally, is cheerful. Today, the chief cause for complaint is the chronic complaining.

The time for growling and grumbling is when the goose hangs high, with everybody feeling smug, self-satisfied, and over-complacent. Then crepe-draping and fault-finding may do some good. Crabbing can help to restore balance. Today calls for pressure on the opposite side: for assurance, cheerfulness, good nature. The very disputes we deplore arise in part as a reaction of the widespread mood of dissatisfaction and lament. It is time to reverse these negative trends.

This need for a more constructive spirit is doubly true in view of the new role of the U. S. in world affairs. U. S. leadership will not be won by formal diplomacy, but by the daily attitude which our people demonstrate. What would our international status become if measured by today's chorus of self-condemnation? Our

global standing will not be helped if the U. S. becomes known throughout the world as Uncle Squawk instead of Uncle Sam.

Particularly impressive are the reports of technical observers who have been surveying the economic ruins of Europe. One of these experts set down a cold-blooded appraisal of the wreckage. Then his feelings got the better of him and he summed up his engineering data: "Blessed is the land that has known no bombs, where everyone has plenty to eat and where people are not worn down by years of deprivation."

America took full share of combat, but we led the world in production. We have come to possess industrial facilities beyond anything heretofore imagined. Our research and technique in a few years scored advances that normally might have taken a quarter century. America has cause for great thankfulness. Yes, I am still bullish on the U. S.

After the V-Days, Washington prophets forecast dire unemployment. They were wrong. Furthermore, instead of sagging, retail trade has soared, brisk even in strikebound areas. Over-riding the shortage of goods and stoppage of output, business vitality has defied the grief mongers. Ample buying power points to still further expansion.

Besides the stricken nations of the world, there are key groups of our own people right here at home who should let up their gloomy forebodings. A reconver-
