 6 p. m.—Alec Templeton (WIBA): and Martha Tilton.

Mondaytime
 8 a. m.—Joe Powers, Home Town Editor (WBBM): new series.

Powdered Coal Engine Announced by Allis-Chalmers

MILWAUKEE (U.P.)—Development of a gas turbine which will drive locomotives fueled by coal ground to the fineness of face powder was announced today by Allis-Chalmers Co.
 Company officials said the firm expects to run tests on the new type locomotive within two years.
 In the new type power mechanism, ordinary coal will be pulverized and shot directly into a combustor to be burned under high pressure. As a result, super-heated gases at 1,300 degrees Fahrenheit will drive a generator which in turn will power electric motors. The motors will furnish the actual power to the wheels.
 The company said the drive system will have a shaft efficiency of about 24 per cent, making the unit "the most efficient single-shaft gas turbine in this country."
 The coal-burning gas turbine locomotive is a project of Bituminous Coal Research, Inc., which granted Allis-Chalmers a contract for its development, the company said.

Why so many people choose Wurlitzer pianos

More Wurlitzer pianos are sold than those of any other name. That's a fact to remember when you choose a piano for your home. Keep it in mind when you hear the rich, abundant tone of a Wurlitzer Spinet. . . when in your mind's eye, you place this attractive, beautifully designed and finished piano in a certain spot in your living room . . . when you learn about the scientific principles pioneered by Wurlitzer . . .
