Nothing scheduled on WNBT or WCBS-TV SILVER USED AS SOLDER

IN TOYS FOR CHRISTMAS NEW YORK-(UP) "Silver-jointed" tricycles are among the toys now being readied for distribution

by Santa Claus this year.

Literally the parts of the frames by Santa Claus this year.

Literally, the parts of the frames are stuck together with silver. It is another illustration of peace-time application of a technique expanded during the war; wider and better indusetrial use of silver brazing alloys.

Melted at relatively low temperatures, the alloys flow almost like water. Capillary attraction pulls water. Capillary attraction pulls the binding fluid in between the most closely matched surfaces. The solder is so strong that a film a thousandth of an inch or less is enough to bind joints second only to welding in strength.

Assuming well-machined surfaces, as much silver as is confidence.

Assuming well-machined surfaces, as much silver as is contained in a dime probably would be enough for the dozen joints of a tricycle.

DOG COMES BACK

MILWAUKEE - (UP) Mr. and Mrs. William Wagner decided to give their dog to the Wisconsin Hi mane society several months

ne dog subsequently found a home with a south side family, miles from his original location. Almost two months to the day after he was turned out by the Wagners, he wandered "home" with "you-can't-get-rid-of-me" look.
