That was an all-star concert which an audience of 1,200 heard Sunday at the Masonic auditorium. The Madison Civic Symphony orchestra's last program of the season—and its last concert under

At the end, the 1,200 listeners gave Prager the ovation he had earned, calling him back for several bows.

Appropriately, the program reached its climax in music from "The Mastersons of Nuernberg" which the conductor described as a "glorification of civic music."

Margaret Rupp Cooper, harpist, gave one of the best performances of her career in Debussy's "Two Dances for Harp and String Orchestra."

Bonita Granville is dyeing her hair (one of the loveliest mops of almost blonde tresses in town) red for her part in "Strike It Rich" which will be made in color.

"June Bride" will be Bette Davis' fourth comedy in all the 57 pictures she's made.

That trip the Rex Harrison plan to make to England soon may still come off—but we doubt it.

Well, Ray Milland is going back to work next week in a new picture in which Audrey Totter will be his leading lady.

This is the epic that Paulette Goddard had been penciled in for. Buster Crabbe, movie star and Olympic swim champ, premieres his Aqua Parade of 1948 in St. Louis Apr. 21 and then will tour.

The show will carry its own portable swimming pool and diving tank—biggest of their type ever built. Requires 150,000 gallons to fill. He has a cost of 100.

Betty Hulton went to the opening of the new show at Slapsie Maxie's because her singing sister, Marlon, was debuting there.

And she was so close to her best-looking brother that she took along her obstetrician. She was so right! At 11 o'clock Betty and her doctor made a mad dash to the hospital.

Last time we gabbed with Sonia Henie she said they were looking for a type like Una Merkel for a top role in Sonia's picture, "The Countess of Monte Cristo."

Maybe we were too fresh, but we said, "What about Una Merkel or is that too simple? Una is a busy gal these days, having just finished parts in two big pictures and with that regular job on the radio show, 'The Great Gildersleeve.'"

She's had a tough time, but things are humming now. — Joan Caulfield, back in Hollywood, was dropped by Paramount and snatched up by Universal the next day.

She'll be John Payne's leading lady in "Larceny" and already has two other movie offers waiting. No wonder she wants to free-lance!

The Hollywood producers who keep "expecting" Robert Donat to come here for picture-making can wait; the wishful bubble burst yet again. Donat's staying in England—and his next will be "Cure for Love" with Alexander Korda.

Now is the time for Red Ingle or Spike Jones to do a new number in their own non-musical

way. A South Americanish tune called, "Ay! Ay! Remember Momma!"

Earl Wilson says that when a reporter says he got a story from "a high source"—he usually means the source was "high!"

Ann Sothern has been added to the stupendous cast of "Words and Music" (the life story of Rodgers and Hart). She'll play a musical comedy queen. Cast already includes Judy Garland, Mickey Rooney, Tom Drake, and Vera Ellen.

The long-discussed return of Garbo to the screen definitely takes place late this summer when she'll do a story based on the lives of George Sand (that was a girl, son) and Claude Debussy. Himm-m-m-m—We thought the George Sand story was pretty well covered in that lovely picture, "Song to REMEMBER."

George Cukor will direct, when he finishes "Edward My Son."

SCOTT... for better reception

One for the music lover who craves Scott quality for record reproduction only. A different one for the music lover who wants record reproduction, the luxury of Frequency Modulation reception and a standard broadcast receiver too.

FOR YOU who love fine recorded music—the Scott Musicale. All fine recordings, no radio. Fine Scott-quality pickup, record changer, speaker and amplifier.

FOR YOU who crave complete Scott quality, want a complete radio-phonograph, but wish to spend less than the famous Scott 800-B costs—the Scott Metropolitan.

FOR YOU if you want the "all-all-all" of the world's finest in both radio and phonograph—with world-wide reception and music reproduction that is "out of this world!"
