Usually not more than one or two members of a family gain a national reputation in tournament bridge, but there are three who have done so in the Leventritt family of New York City. Peter Leventritt is one of the nation's outstanding players, and his mother and father, Helen and Leo Leventritt, are known for their activities in the fight against cancer in children. Not long ago the Leventritt family conducted the annual rubber bridge tournament of the Whist Club of New York, as a result of which approximately \$4000 will be made available for the fight against cancer in children. Leo plays a pretty good game of bridge when he sets his mind to it, and the way he played today's hand proves it. East won the opening lead of the five of hearts with the ace and returned a heart, which Leo won with the king. He cashed the ace of spades, and when the blank king dropped from the West hand, he knew that East had two spade tricks. He had to lose a club, and he had already lost a heart trick. He wanted to make his contract, so he led the deuce of diamonds and finessed dummy's jack. When it held, he cashed the ace and king of diamonds and discarded the five and three of clubs from his own hand. Then he led the jack of hearts, ruffed it, cashed the ace and king of clubs, and when the jack fell from the West hand, he simply played another club and threw East in the lead. East was helpless. All he had was the jack, ten and four of spades. He led the jack. Leo won in dummy with the queen and gave East the ten of spades. The endplay had cheated East out of a trick.
