den complete silence in conver-sation among a group of peo-ple the time is always 20 min-utes past the hour? R. E. T. A. This is but one of the su-perstitions that is associated with the sudden silence that comes occasionally upon a group of people. The silence has been associated with the time of Lincoln's death, though inaccurately. Writers who have made a study of superstition say that oddly enough the time of such a lull in the conversation is more often than not 20 minutes to or 20 minutes past the hour.

QUESTIONS

By HASKINS

Q. Is there any truth to the belief that when there is a sud-

den complete silence in conver-

**ANSWERS TO Modest Maidens** 

Q. How are the immigration quotas fixed? F. G. A. Under the Immigration At of 1924 the number of persons of each nationality who may be admitted annually into the United States for permanent residence is limited to 2 per cent of the population of such nationality resident in the Unit-ed States according to the census of 1920.

Q. How does the population of Canada compare with that of the United States? W. H. G. A. Canada's population is a little more than one-twelfth the population of the United States. Most of the people live in a narrow band close to the United States, half within 50 miles and wants to watch a shortstop with 90 per cent within 150 miles of the boundary.

> Q. Why is red cedar wood preferred for making pencils? U. N. E.

> A. Red redar and redwood have been found best adapted to the sharpening process that a pencil constantly needs and are used for the highest grade pen-cils. The cases for the lowest grades are made of pine.

> Q. Does the heart work continuously during one's lifetime or does it have intervals of rest?
> S. I. A.

> I. A. A. The heart muscle is relaxed more than half the time, and therefore in a lifetime of 70 years a person's heart spends nearly 40 years resting.

The majority of the girls stated they thought the girl was the more responsible of the two. The matured judgment of the scientist confirmed this result. This would be my opinion because a girl who is self-possessed can make the boy behave just about as she pleases. This has been pretty true since the beginning. Even Adam behaved the way Eve told him to.

X/II

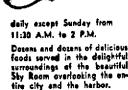

Answer to Question No. 2 No. Brain anatomists find left-handers think more with the right half, right-handers with the left half. You do some thinking with the back of your brain, vention Features, KNX-House Party, EGER-Garden School, L. B. Band (2:40), EFOX-Little Country Girls. but higher thinking and memory require the front part also. Brain anatomist Dr. R. M. Brickner removed both frontal lobes from a patient. He could still do some simple thinking. Another with only one frontal lobe removed could still think well enough to carry on his job.

Answer to Question No. 3

No. Psychologists Landis and Phelps had 20 psychology students predict from photographs the pychologists property of the probable success of 40 college graduates of 30 years ago. Next they compared the predictions with the actual successes of these men. The predictions were worthless. Psychologist H. H. Hollingsworth found peoples'
judgment of intelligence from
photos slightly better than
guesses but judgments of kind-

2914 EAST ANAMEIM Exteblished Over 21 Years

By Jay Alan MCKENNY ON BRIDGE

By WILLIAM E. McKENNEY

TODAY'S hand was contributed by A. M. Sobel, national tournament director of the American Contract Bridge League and known to tournament bridge players throughout the U.S. and Canada.

Sobel said that the hand is not ideally suited to my column because the East and West cards should not appear. I am showing them, however, as most of my readers like to look at all 52 cards. So you may cover up the East and West hands if you wish.

There is no question that South should be in a slam in spades. If he had the queen and one club instead of the queen and one diamond, he would make 13 tricks. If North had the ace, king and one diamond and only three clubs, the hand still would be cold for a slam.

Now we came to the problem that Sobel brought out in con-nection with the hand. Declarer had to get two discards to get rid of two losing hearts. After winning the opening lead of the queen of hearts with the ace and picking up the trumps, how should he play the club suit?

Should he play the acc and king of clubs and then ruff the three, hoping to drop the queen? Or should he take the finesse?

Sobel said that he spent a lot of time figuring out the mathematical odds, and that the rect percentage play is to take "All I done was snitch a veal chop and they start hollerin about cattle rustlers and the code of the west!"

7-14

By Dick Turner

the club finesse. Roughly, he said that the odds are 3-to-2 in fa-vor of taking the finesse, rather than attempting to find the queen with two small clubs. I have not figured the odds my self, but I will not argue with Mr. Sobel, as tournament directors are pretty fine mathematicians.

**PLATFORM** 

IF THE Democratic party wants a tip-top, jim-dandy platform, one that has never been used in the slightest, let it dig up the one it framed in 1932.-Cincinnati Enquirer.
