QUESTIONS By HASKIN

A reader can get the answ question of fact by writing Telegram Information Bureau St. K. E. Washington 2, D. Roless three (3) cents for re-sist.

ANSWERS TO Modest Maidens

Q. How many member nations must be present when a vote is taken in the United Nations Gen-eral Assembly? S.T.

eral Assembly? S.T.

A. A simple majority of states must be present for ordinary matters, but a two-thirds majority is necessary for important matters. What constitutes important matters is listed in the charter. All recommendations relating to the maintenance of peace and security require a two-thirds vote.

Q. When were the longest and shortest keynote speeches made at national conventions? I.M.G.

A. Keynote speeches have varied greatly in length, One of the shortest was made by David Wil-mot in 1860. It lasted only 5 min-utes. Steiwer's speech in 1936 utes. Steiwer's speech in took 140 minutes to deliver.

Q. How long is the life span of a fruit fly? W.S. a fruit fly? W.S.

A. The average life of the common fruit fly (Drosophila) at room temperature is one month. There are several varieties of flies that attack fruits and include some of the most harmful agricultural nests. and include some of the harmful agricultural pests.

Q. What countries, next to the United States, have the highest proportion of telephones to pop-ulation? F.E.R. A. In 1947 Sweden had 1 tele-

phone for every 5 persons while Canada's ratio was I for 6. The United States in the same year had 1 telephone for every 4 per-sons and in the world as a whole there was 1 for every 43 per-

Q. How much does the Empire State Building settle in a year? E.K.E.

A. The Empire State Building is constructed on bedrock and has not settled a fraction of an inch since it was erected 17 years ago. The base is fixed and solid, as is the case throughout most of Manhattan.

Q. Approximately how widows are there in the United States? H.W.L.

The Bureau of the Census A. The Bureau of the Census tabulation, as of April 1947, gives the number of widows of 14 years of age and over as 6.376,000.

short order a designing woman made a fool out of him. But since there are 100 good wise women to one such designing woman, I still think the women who make men out of fools are far and away in the majority.

far and away in the majority.

Answer to Question No. 2

No, your mind grows rapidly
tup to about 14—then more slowly until about 18, and probably
grows slightly up to about 25.
Then it begins to decline slowly
in speed but not in power, until
the end of life. However, Yale
psychologist Walter Miles has
shown it takes until about age
60 to lose even the small amount
of increase that takes place between 13 and 16! Real mental
power never declines at all.

Answer to Question No. 3

power never declines at all.

Answer to Question No. 3

I think it is something quite serious to worry about. These experts maintain that because of machinery we need fewer men to till the farm. True. But on the other hand, the only thing that keeps the cities from dying out is the surplus boys and girls coming in from the farms. What is going to happen if this reservoir of good blood dries up?

How to WIN AN ARGUMENT By After Edward Wigram, D. Sc. trasenting the acleration indirection of 20,000 lines and upon the study of 20,000 lines.

Make Your House a Home With TELEVISION **Authorized Factory**

By Jay Alan MCKENNEY ON BRIDGE

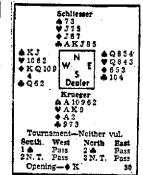

By WILLAM E. McKENNEY

The 1948 intercollegiate champions are Luther M. Schliesser Jr., and Frederick C. C. Krueger of Capital University: Columbus. Ohio. Approximately 160 colleges entered the contest this Each college qualified four

pairs, who played the set hands sent to them by Geoffrey Mott-Smith of New York, manager of the intercollegiate championship tournament. The results were returned to Mott-Smith, who scored them and selected two pairs from eight national zones, who met in Chicago to play the two-session finals. The Capital University pair won by a top score on today's hand.

opening lead of the diamond king was won by Krueger. He then led a small club to dummy's ace, and played a back to the ace. A secand club was led and now the lack was finessed.

Krueger did not make the mis-

take at this point of cashing out his clubs. He led the seven of spades and played low from his own hand, letting West win with the jack. He did this to give West a chance to cash out his queen of diamonds and thereby set up diamontos and thereby set up dimmy's jack. Also, it might place the hard in a position for a squeeze. West did exactly what Krue-ger wanted. The queen of dia-monds was cashed and the third

monds was asshed and the third diamond led, dummy winning with the Jack. Now a small heart was played, wor with the king, and Krueger had that valuable little club to go over to dummy and run the balance of the clubs.

East found himself in a squeeze, He could not protect both the hearts and spedes, so Krueger lost only a spade and a diamond, making five-odd for la top score.
