ONBRIDGE

By WILLAM E. MCKENNEY

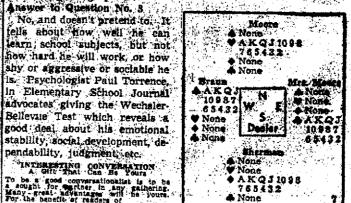

Several times a year I receive fetters from bridge players throughout the country telling ms senout a perfect hand that was dealt. The mathematical odds are to great against a perfect hand that I am forced to pay little or no attention to such letters.

However, at a card party given recently by the Long Island branch of the Railway Mail Association Auxiliary in Flushing. N.Y. Sidney Sherman, a Jackson Heighting N.Y. lawyer, dealt the particle hindge hand.

Sherman set South, Arthur M. Meore, pf. Whitestone, N. Y. was North, and Mrs. Moore was East, Henry Braun, of Follis, N. Y. was West. The hand is shown the way it was dealt, and there were a number of witnesses who

Now if he could divide them exactly in half again and once more give them a perfect riffle, he would find that every fourth card was a spade and each of the other suits would be divided in the same way. Therefore, each player would get 13 of a suit. This is true of course even if the cards are cut. All that the cut would do would be to change the position of the one who gets the spade suit, etc.
