### Well-modulated Voice **Called Foremost Asset**

By ROBERT QUILLEN

SINCE the beginning of time, a screech or a squall. And, mergirls have been taught to ciful heaven, how it jars!

Few people realize how hurtadorn and beautify themselves to attract men. Some thousands of years ago they learned the value of pleasant odors and began to use perfume as a decoy. And every smart girl is an expert in the art of making herself alluring and desirable. And yet, though she knows how necessary it is to delight and charm two of man's senses, she seems unaware of the fact that un-pleasant sounds can spoil the whole effect.

An offensive noise is no easier to bear than an offensive odor.
The jay is one of our most beautiful birds, but his voice grates on the nerves like a cutting through steel. And I have yet to find a person who loves him.

Now, criticism of a girl's voice would be as senseless and cruel as criticism of a deformity if she couldn't do anything about it. But every girl is capable of pleasant tones; and if she uses

ful sound can be. Doctors have shown that it increases blood pressure and increases the acidity of the stomach. Engineers have shown that it reduces efficiency and slows up office And a hateful sound too long and resentfully endured can cause a nervous breakdown or a divorce.

Music hath charms to soothe,

and, in equal degree, an unmusical and blaring voice can drive people nuts. Speak softly and you'll be rewarded.

#### WEALTH GAINS

IN ADDITION to her great population growth, California also has experienced a vast increase in the assessed valuation of property subject to local

taxes.
The California Taxpayers Association reports the assess-ment total for the current fiscal pleasant tones; and if she uses unpleasant ones, it is because she doesn't know it or doesn't high of \$12,193,012,251. This is a gain of 66 per cent over the 1941 total of \$7,350,926,865.—Sacronoto Res.
