"Now then! Open your big mouth for the doctor, Pet!"

Seats in Congress

where it belongs. The present seats are king-

sized enough to accommodate the broad of beam and the long of limb, but therein lies the difor inno, but therein hes the dif-ficulty. When the legislator sits well back in his chair the aver-age upper legislative leg is too short. The front of the seat hits under the bend of the knee and circulation is cut off. The legis-lator, who yields to no one in his desire for ordinary comfort, slides forward. The result is, so we read, the legislative slump. in which the stomach pushes up against the diaphragm, breathing is relarded, oxygen becomes scarce and the "metabolic ex-change" becomes abnormal. The new seats are designed to put the legislative insides back in

their proper places. It seems hardly fair to object to comfort for men who must, as part of their job, listen to so

ANY TALK of slumps among much nonsense from some of Congresmen doesn't neces- their fellow members. But these congressing agest i neces-sarily refer to commodify mar-ket gyration or business activity, They may be talking about what happens to legislative posture in the House seats and how the proposed new seats will right the representative spine and put the representative spine and put ing a little as they ponder the A. Seeds of the Sequoia are the Congressional stomach back problem. Thinking is a lot of among the smallest to be found work in too comfortable a seat. in nature—6875 weigh one ounce -Baltimore Evening Sun.

That article about shoplifters last survivor. He died in Chicago said women steal more than on Feb. 24, 1852, aged 115 years, men. If that is so, it don't mean 3 months, 17 days. He is commen. If that is so, it don't mean they're wickeder. They just see more things they want.

Q. BY WHOM was a system of

standard time first proposed? -D. G. R.

A. As carly as 1828, Sir John Herschel recognized the value of standard time. Twenty years later Greenwich mean time became the standard time of England, Scotland and Wales. In the United States nothing was dont about the matter until the railroads took it up in 1872 in an attempt to end the confusion resulting from the fact that practically every city and village and every railroad had its own private time. Standard time was adopted by the railroads as of 12:00 o'clock noon, Sunday, November 18, 1883.

Q. Is the musical accompaniment usually written especially for a motion picture?-B. M. R. A. For the most part, today, the music is composed for use in a specific film in such a way that it never interferes with or detracts from the picture. Many of the larger studios have from three to six composers perma-

nently on their staffs. Q. How large are the seeds of sequeia tree?—R. A. S.

A. Seeds of the Sequoia are among the smallest to be found -yet these tiny seeds grow to tree that weighs as much as

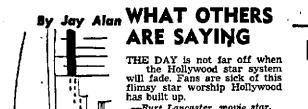

4,299,851 pounds. This means that the giant sequoia multiplies its seed weight more than 472,seen on television, and lives 000,000,000 times.

Q. How did the ancients use elephants in warfare?-R. L. Y. A. In ancient armies elephants at the Met. were employed much as tanks are today. Hannibal used them

to protect his front and to at-tack. Q. Who was the last survivor of the Boston Tea Party?-H.

H. T. A. David Kennison was the
