"They were marked down 50%, so I figured if I bought two I'd save 100%, so they really didn't cost anything!"

Bald Eagle Protected by U. S. Law

By HASKIN

A reader can get the answer to any question... Bald Eagle Protected by U. S. Law

Q. IS IT AGAINST the law to kill a bald eagle? W. A. W. A. The Fish and Wild Life Service says that a special law was passed on June 8, 1940, completely protecting the bald eagle at all times, with a penalty of a fine or imprisonment or both, if the law is broken, depending upon circumstances.

Q. What are the greatest length and width of the state of Texas? P. R. G.

A. From the Rio Grande to the northern boundary the air-line distance is approximately 800 miles. Its greatest width is 750 miles. Texas is as big as all New England, New York, New Jersey, Pennsylvania, Ohio, and Illinois. The towns of Fort Isabel, in the southeast and Texline, in the northwest, are 931 miles apart by automobile.

Q. Are debates in the Canadian Houses of Parliament conducted in English? F. C. W.

A. Both English and French are the legal languages of the Canadian Parliament in Ottawa, and all official records are printed in these languages.

Q. Must every will be probated? J. J.

A. It is necessary that any will which is produced must be probated or proved to be genuine. This is for the double purpose of protecting the wishes of the deceased and the rights of his declared heirs. It also assures that any government taxes will be paid.

Q. How many animals are mentioned in the Bible? R. E. S.

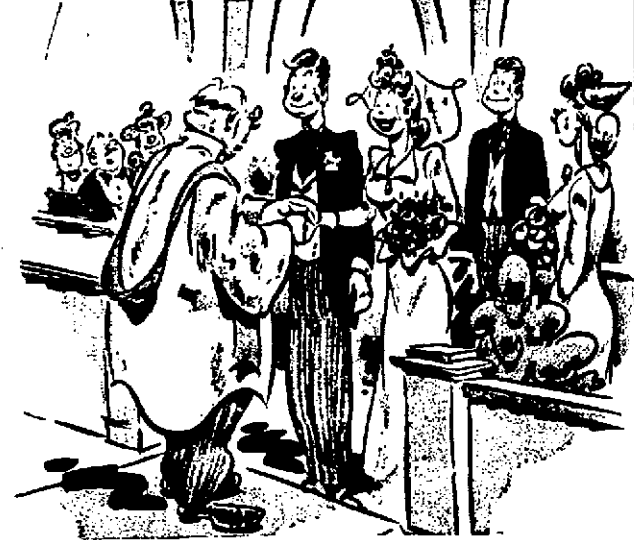

A. According to "Animal Kingdom," 101 animals which can be identified with some degree of accuracy are named in the King James and American Standard Versions of the Old and New Testaments.

Q. Please state the Federal income tax exemptions for a single person from 1940 to date. H. K.

A. Under the 1940 law exemption for a single person was \$800; in 1941, \$750; in 1942, \$500; in 1948, \$600.

MIDNIGHT FOR CINDERELLA

Visiting British Factory Girl Is Going Back 'ome

By HAL BOYLE

NORTH BERGEN, N. J. (AP) The British labor government's most successful postwar export to America goes back home this week.

She's a new kind of diplomat—Ada Fishburn, a 24-year-old factory girl, daughter of a coal miner.

We've had her here on a one-month swap for an American girl who traded jobs with her for that period. The idea of the American girl was that an exchange of factory workers would help international understanding.

And it has worked with Ada, the first British girl to come.

"Ask me to come back again and I won't say 'no,'" she said. She has probably been the most feted English woman to visit these shores since her own Queen Elizabeth, but as she says:

"I haven't let it go to my head. I said I wouldn't and I haven't. Unswayed by America's luxurious indoor bathbaths and its robust outdoor manhood, she is returning content to the land and the lad she left behind her.

The land is the mine-pitted county of Durham near the Scottish border. And the lad is Ronnie Lancaster, her boy friend for many months. She said he wrote "and said he missed me."

It would have been very easy for Ada, a girl who never had been away from home overnight, to have lost her head. She got a 24-karat welcome. She worked days at her factory job, but her nights have been a round of glamorous entertainment. She has seen Manhattan from the deepest subway—"not so clean as our tubes in London, oh, they're beautiful in London!" to the peak of the Empire State Building. "That was a sight."

She has been in an exclusive night club in New York... so excited she didn't eat a bite... tasted spinach for the first time in her life—and couldn't stomach it... it "tasted strong."

She has met some political leaders... gone to two wrestling exhibitions (they impressed her more)... had her hair done by a ritzy Fifth Ave. salon and liked it less than her own \$4 permanent... spoken on the radio eight or nine times.

All this has puzzled her some, but unsettled her not at all. "I am not sophisticated," she said. "I am an ordinary factory girl—a lucky one."

"England never sent us a better ambassador," said her boss, Walter Simpson, president of the

A recession always comes when it's least expected, and as far as I'm concerned this is when it's least expected. —Dr. John D. Clark, member President Truman's Council of Economic Advisers.

Duro Test Corp. "She hasn't become spoiled in the least by her reception."

One reason is the unshakable personal dignity of this small, blue-eyed, fair-haired girl. She has enjoyed her Cinderella role and is reconciled to the fact that midnight always strikes for Cinderella.

"I have so much to tell me mom," she said. She will take with her many happy memories and leave behind her many pleasant remembrances. She has been very popular here with her fellow workers.

"They just treat me as one of their own," she said. "I've never felt lonely. It's the people I met here I'll miss when I've gone back—more than the food. I shan't forget a one."

The factory boys and girls threw a surprise party for her and gave her a robe and some slippers. She has many other presents—\$100 from an anonymous well-wisher, earrings, bubble gum, clothing and, for some odd reason, tea.

Ada got \$40 a week here compared to \$15 at home. She is a top worker and had no difficulty keeping pace in an American factory. But she isn't sure whether the higher salary here meant she could live better.

"The food is dearer," she said, "but clothing costs much less. And the rents—I couldn't live with me family here. And how much do you pay for a doctor?"

What does she like most about America?

"The quickness of it. It's a very rush business. And the gadgets. There isn't so much work to do around the house here."

Would she like to stay longer? "I never expected to have the opportunity to come to America," she said. "I've been in a daze. I am just beginning to realize I'm here. But home is home."

Ada will leave something behind her, take something with her when she goes—a fair and fine exchange in human understanding between ordinary people working in peace.

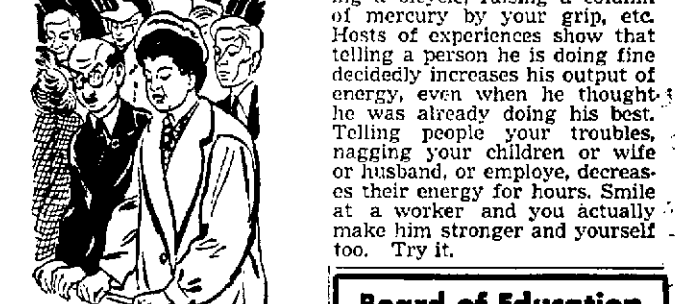

Let's Explore Your Mind

By ALBERT EDWARD WIGGAM, D. Sc.

Answer to Question No. 1 Yes. By experiments on over 1000 men and women psychologist Rex B. Hersey has shown that every 28 to 30 days you are sure to feel depressed for from three to five days. Then, rather suddenly, you spring back. If you take these blue spots for granted, and thumb your nose at them, you will scarcely notice them. But, if you let go, you will go to the bottom of your emotional cycle. This has no relation to women's periodic cycle. In my latest book, NEW TECHNIQUES OF HAPPINESS, I describe how to predict these blue spots—also your bright spots.

POOR PA

Ma prays for my people sometimes, but while she's praying for 'em her mind wanders an' before she realizes it she's askin' for somethin' for herself.
