wrong with you.

Take water. In my youth I was sternly warned that if I didn't drink two quarts of water a day I'd come down with auto-intoxication, whatever that was. Now if you drink more than a quart you're in danger of drowning internally.

Take bed rest. Remember when they kept you in the hospital for two weeks after an No. Remember I told of 100 mothers with one or more children of whom 50 were workers, 50 nonworkers. All but six said hardly let you stay in the hospital long enough to warm the sheets. Tomorrow they may take your appendix out while you're standing up—during your lunch hour, so you won't have to miss half a day's work.

The benefits of sunshine, fresh air and exercise—faiths of my childhood—have been debunked as over-rated. I used to believe people worried and grew thin. No, they worry and grow fat. They used to say, "Eat hearty." Now they say that if you do you'll become overweight and won't live as long.

The man who as a boy took sulphur and molasses for spring fever has a son who gulps vitathey worked for "necessity." Yet the working mothers gave more time and attention to their husbands and children and a higher percentage were happier than the nonworkers, Why? The workers had jobs that fulfilled every normai woman's desire for self-expression—beyond marriage. Many married women try to find this self-expression in clubs, bridge and social activities. It doesn't always work.

Answer to Question No. 2

Yes. As related by the late H. O'Brien in Chicago Daily News, a laboratory cat was sleeping contentedly after a full meal. Suddenly, a dog barked on a phonograph.
