Q. HOW is the antipodes of any particular locality determined? B. McB.

A. The two places must be distant from each other by 180 degrees of longitude, and the one ust be as many degrees north of the equator as the other is south. The word "antipodes," designating two places which are exactly opposite one another on the globe, comes from the Greek word meaning "foot to foot." because two people standing at antipodes would be closest together at the soles of the feet.

Q. What is the distance from which a military salute is given? H D T

A. The salute should be given when the soldier can easily recognize that the person is an officer and entitled to it. Usually this is at a distance of not more than 30 and less than six paces.

Q. When did the Railroad Retirement Act go into effect? Can a person who was dismissed from service receive a pension at the age of 55? T. D. D. A. The Railroad Retirement Act went into effect in 1935. The act has nothing to do with the relation between the individual and the railroad. If a person qualifies for retirement pay, it makes no difference whether he was dismissed by the railroad or not.

POLYGYNY THE ANSWER? Woman Surplus May Mean More Wives for All Men By HAL BOYLE EW YORK. (P) There is a surplus of women in America. In this important field. And the alion of excess women to men is sely to continue. What can be done about it? Some societies have maintained a balance of the sexes by the cruel method of female infanticide. American Mercury, Dr. Ralph Linton, Sterling professor of anthropology at Yale University, says polygyny has worked successfully in a number of civilizations. He says it is done well now in Madagascar.

"I remember the gentic sympathy which the women of the Sakalava tribe extended to my wife because she was an only wife," he writes.

Dr. Linton thinks that if polygyny is ever legally recognized in "western countries it will "find its most enthuslastic supporters among career women."

To an American husband this system certainly has obvious merils. I think 10 wives would be about right, if all remained deductible for income tax purposes.

Answer to Question No. 3

True. Man is naturally a wild animal. He differs from other animals only in having greater intelligence. Like other animals he takes what he wants when: in a state of nature. However, when children appear and the family is founded, morality begins. Each must show some respect for the rights of others. Later when tribes are organized this respect must extend to the whole group. Natural impulses must be repressed and social morality takes its place. Its highest expression is in the golden rule.
