days after our Pan-Am skybuggy deposited us back in New York, I wrote him, repeated my question and pointed out that his statement would appear in an impressive string of papers. This morning I got the following from Tokyo: Dear Mr. Rose:

"I have just received your note of April 24th and am delighted to learn from it that Eleanor and you returned safely after such a long and interest-packed trip. Mrs. MacArthur and I enjoyed immensely seeing you here and only wish that your stay could have been more pro-

longed.

well, the above is a nice enough letter but, unfortunately, it has none of the moving ad libs of the general's off-the-cuff answer. I could write another finish to this column, of course, and tell you about the geisha girl I met, but MacArthur, my syndicate boss tells me, is a lot more noteworthy. And so, relying on what was once a good trick memory. I'm going to reconstruct part of his answer for you.

"There hasn't been a day in the past 13 years, Mr. Rose, that

I haven't yearned to return to my country. My son, now 11 years old, has never been out of years old, has never been out of the Orient, and many's the night I've listened to his sainted mother try to explain to him what the United States is like. For centuries, one single person, rather than an organization, has been the symbol of authority to the Oriental mind and during our Oriental mind and, during our occupation, I have become that symbol. And were I to return home-even for a few weeksword would undoubtedly spread throughout the Orient that the United States was scuttling the Pacific, This, of course, mustn't happen.
"As of this afternoon, we have

neither won nor lost the Battle of Japan. Our military victory is only part of the greater task, and what remains to be done is equally important. And I don't intend to walk out on this job until I die or am removed by my government,

Answer to Question No. 1

No. Three women psychologists, Drs. Anastasi, Cohen and Spatz had 38 Barnard College women keep a diary of fears and worries felt during one week. The average number of fears was 12. The lowest reported, two. The highest, 36—poor girl! The largest number of fears were of "anticipation situation." Most fears centered around school work, which indicates school should prevent fears instead of stimulating them.

Answer to Question No. 2

Apparently not. Psychologist J. S. Himes Jr. questioned 130 men and women Negro students of North Carolina College regarding preferences. Two-thirds of the women stated color of skin or hair was "unimportant." A few wished mates of same color. A small number pre-ferred a darker mate! Of 20 traits, "mutual attraction," "self-control" and "sociability" were among the six "most desirable" in a mate,
