Bas. U. S. Pet. Off. & 1707 by John J. Dille Co

Answer to Question No. 1 The late scholar, Elisworth Huntington, concluded from facts gathered from all over the facts gathered from all over the world and all through history that more bables are born when the temperature is about 62 to 68 degrees. These temperatures occur mostly in late February and spring. He concluded such children tend to live longer, are freer from defects, better balanced less likely to become anced, less likely to become criminals, have better health and are more likely to rise to fame and fortune. Unfortunately I was born in October which probably accounts for both my poverty and criminal tendencies.

Answer to Question No. 2
False. It would be hard to crowd more nonsense into one crowd more nonsense into one sentence. One-half of every cell in your body and brain come from your mother, one-half from your father. Some qualities from one parent are more likely to show, that is be "dominant," than those from the other side. than those from the other side. However, the dominant qualities as well as the more hidden "recessive" qualities are just as likely to come from one parent as the other. Furthermore, your grown-up intelligence and character are greatly influenced by your invironment and education.

Answer to Question No. 3

No. I know a boy with an IQ
of 177 (true genius) who could
not read his name. In six months
Dr. Grace Fernald of the University of California at Los Angeles, had him reading like a college professor (which may not be saying much—but it's better

Questions, Answers Modest Maidens

By HASKIN

Q. HOW MANY words are there in the current U. S. budget? C. W.

A. The U.S. budget for 1949-50 contains 1,500,000 words on 1625 pages that are closely printed.

Q. Who cast the dissenting vote in the House of Representa-tives on Dec. 8, 1941, when the

declaration of war against Japan was voted on? P. M.

A. Jeanette Rankin, from Montana, cast the only dissenting vote when war was declared against Japan, Dec. 8, 1941.

Q. When and where were pub-lic stands to accommodate a

A. The first stands ever built for a fight audience were those erected for Tom Spring's battle, January 7, 1824, with Jack Langan, the Irish champion. The stands seated 4000 and were built in the outskirts of Worcester, Eng., safe from police interfer-

Q. Who originated the theory of probabilities? C. D. Y.

A. This theory reputedly grew out of the desire of a French gambler to know what were the odds in favor of a certain event that he was betting on. He took the problem to a professor of mathematics of the University of Paris, who became very in-terested and worked out the theory of probabilities.

Q. Has Thomas Merton, author of "Seven Storey Mountain" become a priest? E. E.

A. The author was ordained a Trappist priest at Our Lady of Gethsemani Monastery near Bardstown, Ky., on Ascension Day, May 26. He assumed the name "Father Louis."
