Q. WHAT WAS the result of the Air Force investigation of the phenomenon known as "flying saucers"?—L. D.

A. The Air Force began investigating the mysterious "disks" two years ago because "disks" two years ago because they usually were reported by persons in airplanes. A paper prepared by the Intelligence Division of the Air Force Materiel Command declares: "Many of the incidents aiready have answers — meteors, balloons, faling stars, birds in flight, testing devices, etc. Some of them still end in question marks." The Air Force was convinced from careful study that there are "no careful study that there are "no alarming probabilities" in the mysterious aerial manifesta-tions.

Q. Is there available a report on the number of men of the Jewish faith who were killed while fighting in the United States armed forces in World War II?—J. M. M.

A. Figures are not available on the number killed. However, the National Jewish Welfare Board has said that there were more than 40,000 Jewish casual-ties in the American armed forces in all the four casualty categories: death in combat, wounded in combat, prisoner of war, and missing in action.

The class of 1924 has done all right for itself. In fact I have come to the conclusion, after studying some statistics compled for the class' 25th reunion this year, that one of the signs of a misspent life is not to have been graduated from Yale University the year Calvin Coolidge was elected President.

These highly secret figures were smuggled to me by a ribaid friend who sent them here, hidden in an old pumpkin, via an intermediary. The man traveled on a coach car of the New York, New Haven and Hartford Railway to avoid detection.

Answer to Question No. 1

Provide enterprise.

No, unless women have changed since World War II.

Prior to Pearl Harbor a survey Prior to Pearl Harbor a survey showed 100 per cent of employers thought women less stable on the Job than men. This led personnel expert Harold Bergen to study the matter for a company employing 20,000 men and 13,000 women. The women held their jobs one and a half times longer than men. So there you are. to look beynd its own graduates for its future crop of freshmen. Only two men had as many as six children. Forty-two had

none.

Some 194 men thought the country was in for more inflation, 90 thought prosperity would continue, 37 foresaw recession and 177 a depression. On the other hand, 161 thought the outlook of their own business was good, 125 believed it was fair and only 10 poor. Yale men are self-reliant. They believe in themselves. No. Everybody can become a good speller. But many schools use the two best methods known for making poor spellers. First, they have you spell out loud from dictation. You get an ear picture of how the word sounds,

AUNT HET

Pa soon forgives me for everything else but one thing he can't bear is to have his feelings hurt and be mad at me and me not notice it.

but no eye pictures of how it looks. When you try to write it you have to guess at it. Second, they have you copy words. This is even worse, because you look back and forth at the word and get a jumbled picture of it. You should look at the word, put it out of sight, then draw the picture of it from memory. This makes perfect spellers. You spell by word picture, not by sounds.

Answer to Question No. 3 Yes. One of the hardest things

is to do a kindness to people and not hurt their feelings and make them enemies. I said to an old lady climbing up the car steps, "You're going the wrong way—that's the smoking car." She held up a corn cob pipe and snorted: "Young feller, I want." to take a few puffs meself."
