By HASKIN

Q. WHAT IS THE BRIGHTEST object in the night sky not counting the moon? W. C. D. A. Next to the moon, the planet Venus is the hightest ob-

ject in the night sky It appears
12 times more brilliant than the
bright star Sirius.

Q. How does the length of a kilometer compare with that of a statute mile? G. N. R.

A. A kilometer is equal to 0.62 statute mile or about three-fifths. The kilometer was orgi-nally intended to be the distance from the equator to the pole.

Q. Who invented whisky? G.

A. The invention of whisky is a matter of contention between the Irish and Scotch which probably never will be settled. The distillation of alcoholic bever-ages from fermented liquor became general throughout the whole of Europe during the 16th and 17th Centuries.

Q. Are dragons purely imaginary creatures? F. P.
A. The dragon is an imaginary monster, usually conceived huge-winged, fire-breathing lizard or snake. The word "dragon" is derived from the Greek, meaning "see" and interpreted "sharpsighted." In Greece the word "drakon" was used originally of any large serpent, and the dragon of mythology, whatever, shape it

To a large extent, yes. Extensive tests show rough and tumble children have better personalities than those whose parents are of the "watch-your-step," "don't get your feet wet" type. Children who play competitive games have better personalities than those who prefer to play alone. Children who go to Sunday School or are members of the Boy Scouts, Campfire Girls, Y. W. or Y. M. C. A. or Y. M. H. A., or an orchestra, debating. team, etc., have the best person-alities.
