Facts About Pedestrians

"Hesitation on the part of the pedestrian sometimes is a contributing factor to an accident," declares B. C. Salisbury, director of the safety division of the Wisconsin motor vehicle department. "When the person on foot shows he is undecided in his movement, his action proves confusing to the motorist," Salisbury points out. "We have records of some accidents in which there are several pedestrians crossing a roadway, and one or more start ahead while those remaining step back to avoid a fast approaching vehicle," Salisbury says. "To reduce the number of pedestrian mishaps, both the driver and pedestrian must have more respect for one another, and both must know and respect the traffic laws which govern their movements," Salisbury adds.

Farmers' Cash Receipts Increase, USDA Reports

WASHINGTON — (UP) — The Agriculture department estimated Thursday that farmers will receive \$3,100,000,000 from their November marketings this year—8 per cent more than a year ago. All of the expected increase in cash receipts was attributed to higher prices. The report said, however, that despite the post-Korean upsurge in farm prices, farmers' cash receipts from marketing during the first 11 months of the year would total only about \$25,200,000,000, or 1 per cent below last year's level.
