The Sunday Spotlight

programs of long standing are leading, although a couple of com-

parative newcomers - "The Halls of Ivy" and "The Big Show" - are receiving substantial support.

(State Journal Radio Editor)
Polls will close Tuesday in The State Journal's

adio balloting, and results will be announced here

next Sunday.

So far, results can't be predicted, but in general

receiving substantial support.
Other programs and individuals now at the tops of their respective lists—many of them by narrow margins—are these:
Bob Hope . Arthur Godfrey . "Theater Guild on the Air" . Metropolitan Opers . Bing Crosby . First Piano Quartet . Groueho Marx . "Fibber McGee and Molly" . "America's Town Meeting of the Air" . Edward R. Mutrow . Bill Stern. In other groupings—notably among vocalists—there was a wide divergence of opinion among listeners, so wide that nobody could guess at the final results.

"Elmer Davis should be returned to WISC."
"I listen to practically all commentators and musical programs."
"Give us more Fulton Lewis."

"Sunday church programs—the more the bet-

"Sorry 'Halls of Ivy' advertises beer."
"I think your poll is a terrific idea. I'm interested to learn the results."
"How I miss Berle!"

"How I miss Berie!"
"Murrow ought to get a drama vote, too."
"Edward R. Murrow noses out Frank Edwards because of his coverage."
"We use your radio schedule every day. We think you maintain a pretty good halance of good programs."

"Arthur Godfrey . . , just enjoys life and makes others enjoy it, too."

There's still time to vote. Here's a ballot you may

The Chass show (to 1)

There is an old idea that an ocean vessel which sinks in deep 7,000 pounds to the square inch water may become suspended part way down to the bottom. This idea grew from the viewpoint that wasel gets the pressure from above the performance of part way down to the bottom. There is a crushing force in the sinks completely below the surface, it will keep on sinking until for that. The air pressure linide it takes is lugar to more than been done to learn how much air pressure, but we onto the solution pressure in the sauchen vestigates the pressure from above the performance of the pressure is so great at a depth as well as from below. It will keep that the everything about the diver's going down to the bottom.

There is a rushing force in the suit should be in good condition, and that he shall have a steady water, and a human being who supply of air at the right pressure.

The truth is that if a vessel which sinks in deep 7,000 pounds to the square inch. That is a great pressure, but we ent depths.

Some divers work at depths of going down to the bottom.

There is a crushing force in the water, and a human being who water, and a human being who supply of air at the right pressure.

It also is important that he shall have a steady supply of air at the right pressure.

It also is important that he shall have a steady supply of air at the right pressure.

It also is important that he shall have a steady supply of air at the right pressure.

There is an old idea that an pressure goes up to more than been done to learn how much air from the different way down to the bottom.

There is a crushing force in the water, and a human being who water, and a human being who water, and a human being wat

MIDGET FUND SHUTTEBURY, Mass .- (UP) This town is taking no chances. It maintains a 50-cent emergency fund. The last town meeting appropriated \$72 for an item which "Here in My Arms." "I Hear You called for only \$71.50. So the extra Calling Me," "The Bells of St. half dollar was established as a

it reaches the bottom.

There is more pressure, to be sure, the farther down an object goes, but the pressure is due almost entirely to the weight of the water above. At the surface there deviced diding, suits of various is a diver comes up too fast, effectively and the surface there deviced diding, suits of various.

In all will keep on sinking until that. The all pressure is to small to guard be pulled up slowly. Otherwise he may suffer illness, even death. One illness which comes from moving the diver too rapidly is known as water above. At the surface there deviced diving, suits of various. 7 p.m. - Charlie McCarthy (WKOW); and Paulette Goddard.

water above. At the surface there devised diving suits of various 2:30 p.m.—Quiz Kids (WIBA); is air pressure of 14 and seven kinds. with high-ranking Eiks, including tenths pounds to the square inch Charles E. Broughton, Sheboygan. Charles E. Broughton, Sheboygan.

6:36 p.m.—Mystery File (WENR):
Jan Murray, Radie Harris, guests.

(about the same air pressure you must be provided with air if he is him up more slowly. A better way, to work for any length of time un widely used at present, is to place der the surface. Such air may come him in a "recompression chamber."

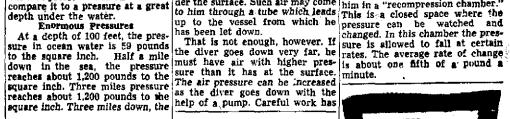

This is a closed space where the water.
