

RADIO, TELEVISION and F. M. PROGRAMS

Table listing radio stations: KLAC 570, KFI 640, KMPC 710, KECA 790, KHJ 930, KFWB 980, KNX 1070, KFOX 1280, KFAC 1330, KGER 1390.

The following programs are compiled from reports provided by the broadcasters. No responsibility assumed for last-minute changes which sometimes are made.

DIAL LITES—TODAY

10:00 A. M.—KNX—The distinguished violinist Erica Morini is soloist as George Szell conducts the New York Philharmonic Symphony. She will play the Tchaikovsky "Concerto for Violin and Orchestra in D Major."

11:30—KNX—During pre-Christmas week, top correspondents of the foreign corps of CBS have been flown in from almost every corner of the globe, for the full-hour year-end report broadcast with Edward R. Murrow as chairman.

1:30—KNX—On his New Year's Eve show, Jack Benny will present a serio-comic fantasy in which the old year, represented by "Father Time, greets little 1951 and gives him some tips."

8:30 A. M.—KTLA—Special holiday scheduling of Tournament of Roses Parade.

11:15 A. M.—KTLA—Special holiday scheduling of Tournament of Roses Parade.

1:30 P. M.—KTLA—Special holiday scheduling of Tournament of Roses Parade.

3:30 P. M.—KTLA—Special holiday scheduling of Tournament of Roses Parade.

5:30 P. M.—KTLA—Special holiday scheduling of Tournament of Roses Parade.

7:30 P. M.—KTLA—Special holiday scheduling of Tournament of Roses Parade.

9:30 P. M.—KTLA—Special holiday scheduling of Tournament of Roses Parade.

11:30 P. M.—KTLA—Special holiday scheduling of Tournament of Roses Parade.

TELEVISION

SUNDAY, DECEMBER 31, 1950

Table of television programs for Sunday, Dec 31, 1950. Columns include station, time, program name, and channel.

TOMORROW (Monday), JANUARY 1, 1951

Table of television programs for Monday, Jan 1, 1951. Columns include station, time, program name, and channel.

FREQUENCY MODULATION IN MEGACYCLES

Table showing frequency modulation in megacycles for various stations.

SUNDAY, DECEMBER 31, 1950

Table of radio programs for Sunday, Dec 31, 1950. Columns include station, time, program name, and frequency.

MONDAY JANUARY 1

Table of radio programs for Monday, Jan 1, 1951. Columns include station, time, program name, and frequency.

TOMORROW

Table of radio programs for Monday, Jan 1, 1951. Columns include station, time, program name, and frequency.

Radio-TV Industry Faces Cutbacks in New Record

By WAYNE OLIVER

NEW YORK (AP) Television in the past year has nearly trebled its viewers and now reaches one-fourth the homes in the United States.

Around three and three-quarter million sets were in use as the year began and final 1950 production figures are expected to show nearly seven and one-half million new sets made during the year.

It also was a big year for radio. Manufacturers turned out around 15,000,000 new sets—third greatest production in industry history—to bring the nation's total close to one hundred million sets in use.

And combined—radio and television, broadcasting and manufacturing—became a three-billion-dollar-a-year industrial giant wielding tremendous influence on the nation's way of life.

In common with other businesses the radio-television industry faced—as the year came to a close—the prospect of sharp curtailment of its normal activities in favor of defense efforts.

Although having little direct or immediate effect on the industry, the FCC decision on color broadcasting during the year.

'Clear Channel' Radio Stations Oppose Treaty

By JACK RUTLEDGE

WASHINGTON (AP) Farmer Brown and his little table model may find themselves in the middle of a bitter Senate battle over a new international radio agreement.

The big "clear channel" stations, which plan to do everything possible to block the treaty when it comes up for ratification next year, claim that the treaty will result in added interference in remote farm areas.

Farmer Brown's need for such things as weather reports, market news and frost warnings as well as entertainment will certainly be brought to Senators' attention.

The treaty is designed to split radio frequencies among stations in the U. S., Canada, Cuba, Mexico, the Dominican Republic, Jamaica and the Bahamas in such a way as to cut down interference as much as possible everywhere.

State Department and Federal Communications Commission negotiators claim it was the best they could do under the circumstances and that the pact will give U. S. radio stations and listeners at least five years of protection.

But the clear channel stations, backed by strong farm organizations, are against it. The stations claim that too many concessions were made and that under the pending treaty many rural listeners would get more, not less, interference.

Not only that, they say the treaty blocks plans to cover a wider area with clear channel stations and give farm listeners a choice of at least four programs at night. At present many can't get even one clearly.

This goal can be attained, the clear channel people say, if 17 clear channel and three other stations are allowed to boost their power from the present ceiling of 50 kilowatts to 750 kilowatts.

The government had to step in. Eventually it worked out a system of 107 channels divided among the hundreds of stations. This could be done because many low-powered stations, if scattered widely enough, could operate on similar channels without trouble.

In order to reach remote areas—Farmer Brown and his table model—the government set aside 25 channels as "clear" channels. Only one or a very limited number of stations could operate on these 25 at night with high power.

Soon the U. S. had its house pretty well in order, but neighboring countries also began to boom in radio, and foreign stations began to drown out or at least cause trouble for many U. S. stations.

Treaties were worked out—and ratified—which fitted these foreign stations into the 107-channel jigsaw puzzle.

But the treaties expired. A new one had to be worked out. And the job was more complicated than ever, because the radio industry here and in other North American countries and nearby spots had expanded to the point where there are almost 3000 stations.
