Scientists Find Electrified Air Slows Cancer in Rats, Some Malignancies Ebb

By FRANK CAREY
Associated Press Science Write

sible use" of especially electrified cells." air to try to retard or halt cancerous growths.

But they told the American Association for Cancer Research that malignant growth in these rodents is "considerably retard changes take place in the bodies to the considerably retard changes take place in the bodies and the considerably retard changes take place in the bodies the considerably retard changes take place in the bodies and the considerably retard the considerably recording the formation. to disappear" when the creatures are kept in an atmosphere of

ticles created in air when a neutral atom gains or loses electrons. When electrons are last, the particle is positively electrified; when electrons are gained, air saturated with negative ions the particle becomes a negative developed very slowly, and in other

way by artificial means.

The scientists said their studies they declared. The scientists said their studies indicated that cancerous tissue has a different electric charge from that of the surrounding normal tissue. And they declared that apparently these electrical changes make the membrane of the cancer cell more permeable.

REHEARSE FOR FESTIVAL For the third year the Long Beach Jewish Community Center will present a fostival of Jewish music. Open to the public without charge, it will be held tomorrow night in Town Hall, with curtain time at 8:30. Sam Leddel, president of the center (left, above), watches a rehearsal with Bernard Wilets holding the score to his original composition, "Hebrew Overture," which will be played. Ten-year-old Arthur Lederman, Long Beach violinist, will play a group of selections. His sister, Barbara, is rehearsing the piano accompaniment. Also to be featured are Cantor Saul Silverman and his Synagogue Choir, the Ruth Zahava Dance Group and many others.—{Robert
