Answer to Question No. 1
Yes. Women not only live longer than men but their chances are increasing. In 1900 a woman 26 years old had only 80 chances in 100 of living to 49, but now she has 94 chances. Since most mothers bear their children between the ages of 20 and 30, this makes it almost certain that they will live long enough to see their sons and daughters grown up and get married. What a great day to be alive!

Answer to Question No. 2 I can only say that I'd be rich now if I had followed the advice now if I had followed the advice of the late millionaire, Collis P, Huntington: "When going into business, if you can get the other fellow to put up the money it's better." Yes, decidedly "better." We're warned to "always consult bankers." Huh! I've in the state of vested in 27 enterprises on the "advice" of these financial wise-

guys. I've concluded all us pro fessional dopes had better stick to government bonds or bury our money at Fort Knox.

Never, says Professor Nor-man Lewis, instructor in English

intoxicate a person? A. Up to 62 per cent of any alcohol vapor inhaled can be absorbed into the blood stream. The ramining 38 per cent usually is exhaled and the 62 per cent absorbed by the blood is burned by the body fast enough to prevent intoxication. However, a person drinking alcohol will get drunk much faster if he is in a room

with a large amount of alcohol vapor in the air.

Q. What inspired Rachmanin-

off to compose his "Concerto No. A. After the apparent failure of his first concerto, Rachman-inoff was in a state of depression and apathy and his friends' efforts to help him falled. Finally Dr. N. Dahl, a specialist in autosuggestion undertook to bring the dejected composer into a creative frame of mind again by the constant suggestion that he would soon start a new concerto which would be a great success. Rach-maninoff vouched for the fact of his cure and dedicated "Concerto No. 2," his most popular work,
