© 1951 by John F. Dille Co. YOUR OPINION Answer to Question No. 1 Yes, probably. Happiness tests indicate that more young women are unhappy and find life harder to bear. Twice as many women as men under 30 try to commit suicide, although more men suc-

ceed. It may be that women feel less equal to meet poverty. ill-ness, loss of job, disappointness, loss of job, disappoint-ments in love and marriage, etc. However, these arguments do not hold much water because women stood the depression better than men.

Answer to Question No. 2
Only partly so. Willingness to believe everything — "swallow-bility," as I call it—is chiefly a sign of lack of education in the scientific way of thinking, How-ever, Dr. S. B. Sells, of Columbia University, found that students of physics were often guillible about chemistry and vice versa. Surely they could not have been trained in the scientific method of solving all practical problems. Great scholars in art and liter ature often fall for tomfool diet fads, palmistry, numerology, and even social, political, and eco-nomic bunk.
