SAPELO ISLAND, Ga.—(R)—Richard J. Reynolds Jr. and his third wife honeymooned Sunday in a 60-room mansion of this lao-

lated island which the tobacco heir

owns.

The 46-year-old Reynolds and Mrs. Muriel Greenough, 33, 37 Toronto, were married by a Methodist pastor from the mainland Friday night. It is the third marriage for both

The ceremony followed by one day Reynolds' divorce in Miami by

Marianne O'Brien Reynolds, who was granted a two-million-dollar settlement.

The only permanent residents of Sapelo, 60 miles south of Savannah, are estate employes and several score Negro families, descendants of island slaves.

The 12-mile long, 3-mile wide is-land is one of three of the famous "Golden Isles" of the areas which

Reynolds owns. Sapelo can be reached only by boat or plane.

Sunday night. It was so good that it is likely to remain the high point of this season's music in Madison.

A capacity audience greeted Prof. Richard C. Church, his orchestra, and his soloist — Pianist Marjorie Loberg, who played Rachmaninoff's second concerto.

The concerto closed the program on a thunderous and melodic note. In the finale, Miss Loberg brought out unsuspected power—a burst of playing which might well have come earlier.

This concerto, one of the most popular of all, is fashioned from gorgeous melody and rich harmonies. To be at its best, it must be played throughout with fire and passion, such as the soloist gave it at the end.

Miss Loberg showed herself a more than competent pianist, equipped with dexterity and skill, We'd like to hear her play a more suitable work.

# Gasoline **n 91 (**

Today's more powerful engines require a highly complex gasoline to deliver their full power. There can be as many as 1500 different chemical compounds in a gallon of gasoline.

To select the best of these chemicals, and to arrange them properly to fulfill the needs of your car calls for the last word in refinery equipment and scientific skill.

It is Shell's manufacturing policy to make "The most powerful gasoline your car can use." Shell activates gasoline by splitting and rearranging petroleum molecules.

The result—Shell Premium—the most powerful gasoline your car can use. See the Shell Dealer in your neighborhood.
