The seed that will feed your children

Your children are lucky. They are growing up in a nation rich in food, abundant with the pleasures of life, overflowing with opportunity.

What occasions this good fortune? Fertile soil? Tall forests? Deep mines? The quick minds of our inventors? The discoveries of our scientists? The factories that produce a flood of goods priced within the reach of millions?

These things are part but not all of the answer.

There is something more-the factor the old Romans called "profectus," meaning to progress, to profit.

Yes, profit and progress have one root. The farmer improves his farm for profit; factories are modernized and enlarged for profit; we all progress to better jobs for profit; we save and invest our money for profit.

Profit and progress grow from one seed-the seed that grows into jobs, homes, food and happiness for us all.

Only as it profits from its services to Mid-America can the Illinois Central progress. Today our profits are reduced by competition from truck lines, air lines and barge lines, all benefiting from huge direct and indirect subsidies paid by tax money from your pockets.

It will profit you to halt these subsidies. You'll save money on taxes. And with all transportation-rail, highway, air and water carriers-competing without subsidies, you will benefit by economical and efficient transportation -the backbone of the industrial and agricultural prosperity you and your children enjoy.

WAYNE A. JOHNSTON President
