HEART TROUBLE

Many who have the vitality to get well of an attack of influenza are frequently left with some form of weakness that is stubborn, and unless given chiropractic attention will most certainly become chronic. One of the frequent discoveries is that "flu" has left its victim with heart trouble.

All life functions of the body are transmitted over the nerve lines of the body, and the usual place where this transmission meets interference is at the spinal nerve openings when spinal joints are slightly or seriously displaced. The chiropractor by his adjustments restores the mechanical alignment of spinal bones and thus the CAUSE of the weakness is removed. Health follows as a natural result. Telephone FOrest 6-3465 for an appointment.

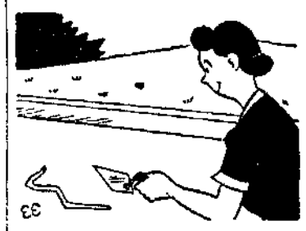
Fix It Yourself

By HUBBARD COBB
(The Handy Man)

PREVENTING TROUBLES FROM FROST



People who live in the hot climates are bothered by insects, heat, snakes, flesh eating fish, and too much rain. People who live in cold climates are bothered by high taxes and frost.

Frost is a real trouble maker because it can get into a very small crack when it's still moisture. Then, when it gets cold it turns to frost and expands. When it expands, something has to give. Each winter things give a little more and pretty soon you've got a big crack that can cause real trouble.

Frost can cause trouble at almost any point but one of the worst is around masonary where a small crack develops around the motar joint. Mortar often shrinks a little on hardening and this leaves a good spot for frost to enter. There are several ways to treat these small cracks so they won't cause trouble. One is to coat over them with waterproofing compound. Another is to paint the surface and a third is to cut out the crack and pack it with mortar. If you don't care about appearance, the cracks can also be filled with caulking compound.

Cracks in drives, walks and terraces should be patched with mortar before cold weather sets in to avoid trouble. Cut them out, wet down the sides and pack in mortar. Points where masonary surfaces join other masonary or wood should be filled with caulking compound or tar. Either one provides a means for allowing expansion and contraction of the two materials and yet will maintain a waterproof and frost proof joint.

Frost is great for getting in under the metal flashing where the roof joins the chimney and for this reason it's important that the flashing be tight and protected at seams and edges with roofing cement.

EASY LISTENING

ALTIN, B. C., Oct. 10 — (AP) Talk about telephone party lines! An ordinary radio set can pick up conversations on the radio-telephone circuit between this mining town and Whitehorse, Yukon territory. Residents are urging that measures be taken to insure privacy.
