Talk' Tonight Shows 'Sons-Vox'

Proof that speech is not confined to human beings will be offered by Gilbert Wright, Los Angeles inventor, when he demonstrates his "Sono-vox" during a broadcast at 8:30 tonight on NBC-WIBA. The device converts sound waves into vibrations which, in turn, are converted into words. Wright, son of novelist Harold Bell Wright, will present a scene in which automobiles, flames, bells, animals, and sirens will hold animated conversations.
