at Charlotte where the alleged killing took place.

Nellie," "Ida, Sweet As Apple

### Roosevelt Defends Plans for Arabian Oil Pipeline

WASHINGTON — (U.P.) —Pres. Roosevelt Friday defended plans for this country to build a \$165,-000,000 oil pipeline from Arabia to the Mediterranean.

Reserves in this country are being depleted, he said, and the Arabian project is a forward-looking safeguard for the future.

He denied, during his news conference, reports that the Cairo and Tehran conferences involved discussion of a proposal for an Anglo-American - Soviet program for worldwide sale and distribution of petroleum products.

Mr. Roosevelt said this report was a shot in the dark and not true. Cider,"

own diagram with the figures I have given.

How can we be closer to the sun in winter than summer? That is a question which people in South Africa and Australia do not ask. In their hot weather period, the sun is closest, and in their winter the sun is forthest away.

In the northern hemisphere, it is the other way around. The tilt of the earth's axis gives us slanting sun rays in December and these do not warm our part of the world so well. Also the sun shines on us longer each day in summer than in winter.
